Faculdade Impacta de Tecnologia

**Scrum Foundation Professional** – Certification  
CertiProf

**Information Architecture** – Certification  
Faber Ludens Institute

## Languages

**Portuguese**  
Native language

**English**  
Proficient – I can read, write, and talk

**Spanish**  
Basic in reading and talking

## Professional Experience

**DORIS.MOBI** 2020–Present  
Technical Leader  
(prev. Engineering Manager and Software Engineer)

Work based on test-driven development (both unitary and end-to-end testing) on different products, like native apps, dashboards and widgets.

**LUA.NET** 2019–2020  
Software Developer

Joined the team as UI Developer, maintaining and building new features for the beta app and online store, using AngularJS and Ionic. The latest version stack was React, React Native and Magento 2 as API.

**Gumini Digital** 2016–2019  
Software Developer

Since Gumini is a software factory, I worked with many clients, like advertising agencies, startups and corporate. Some clients were Microsoft, DDB Group, Dentsu Aegis, Samsung and Summer Olympics. Worked mostly as front-end and Wordpress developer.

**ELOCC (former Elo Digital)** 2015–2016  
Front-End Developer – Contract

Elocc clients were most e-commerces using the biggest platform in Brazil, called VTex. I worked most of the time building new shops and creating new features based on the platform API.

**The Branch Machine** 2014–2015  
Front-End Developer – Contract

Worked as a freelancer on the website of the former presidential candidate Aécio Neves during the 2014 elections. After that, the team worked on an open source project called "brazil.com.vc", which was like a kickstarter for professionals that can help institutions with their time and expertise.

**ED Comunicação** 2013–2014  
Front-End Developer

Most of the projects were marketing-related, but there was one product called "What Eat", which was a guide to comfort-food in São Paulo, Brazil. In this project, I worked also as Information Architect, making personas, wireframes and flowcharts.

**Citrus7** 2011–2013  
User Interface Developer

As many small digital-agencies in Brazil, we made a lot of websites, landing pages and one app in Phonegap for a big construction company called Gafisa.

**IBM** 2009–2011  
User Interface Developer

Worked inside São Paulo division, making projects for marketing and tooling for IBM Global Services.
